Research Interests

Generative and Agentic AI · Digital Platforms and Online Communities · AI Governance
Healthcare Analytics · Operations and Supply Chain Analytics

Education

Georgia State University

Atlanta, GA

Ph.D. in Business Administration, Computer Information Systems

2022 – Present

Advisors: Dr. Arun Rai & Dr. Yusen Xia

Affiliations: Institute for Insight (IFI) · Center for Digital Innovation (CDIN)

Dissertation: *AI Integration in Digital Ecosystems: Adaptive Engagement and Agentic Choice Distortions*

Expected completion: Spring 2027

Proposal defended: September 2, 2026

Committee: Dr. Arun Rai (Co-chair), Dr. Yusen Xia (Co-chair), Dr. Xinyu Fu, and Dr. Aaron Baird (External Member, Colorado State University).

Georgia State University

Atlanta, GA

Master of Science in Quantitative Risk Analysis and Management

May 2022

Master of Actuarial Science

May 2022

Graduate Research Assistant: Dr. Yusen Xia, beginning Fall 2021.

Research

Working Papers

- [1] “Architecture as Governance: How AI Service Design Shapes Resource Consumption and Tariff Form.” *Working paper*. *Formal theory of access governance linking AI service architecture, contractible usage, resource consumption, and tariff design*.
- [2] “Adaptive Engagement in Online Q&A Communities under the Introduction of Conversational LLMs.” In collaboration with A. Rai, Y. Xia, and X. Fu. *Targeting submission October 2026*. *Examines changes in responsiveness and evaluation within online Q&A communities following conversational LLM introduction, using matched historical comparisons*.
- [3] “A Causal Discovery Framework for Data-Driven Hypothesis Generation.” In collaboration with A. Baird, M. Lajnef, A. Rai, and Y. Xia. *Invited for revision, ACM Transactions on Management Information Systems*. *Causal machine learning and LLM-assisted hypothesis generation in healthcare; application to substance use disorder treatment using TEDS-D data*.
- [4] “When All-or-Nothing Fails: Endogenous Customer Service Times in Guaranteed-Service Models.” In collaboration with G. Li, Z. Liu, and Y. Xia. *Revising for submission to Operations Research*. *Endogenous delivery promises and safety-stock placement; structural analysis; dynamic programming; numerical experiments*.
- [5] “Statistical Analysis of Home-Sharing Effect.” In collaboration with L. Peng and V. Yao. *SSRN Working Paper*, No. 4034848 (2022). [SSRN](https://ssrn.com/abstract=4034848)

Refereed Journal Articles

- [1] Wang, G., **Wei, X.**, Yu, B., & Xu, L. “An Efficient Proximal Block Coordinate Homotopy Method for Large-Scale Sparse Least Squares Problems.” *SIAM Journal on Scientific Computing*, 42(1), A395–A423 (2020). <https://doi.org/10.1137/19M1243828>
- [2] **Wei, X.**, Gotoh, J. Y., & Uryasev, S. “Peer-to-Peer Lending: Classification in the Loan Application Process.” *Risks*, 6(4), 129 (2018). <https://www.mdpi.com/2227-9091/6/4/129> [Code & Data](#)

Professional Memberships

- Association for Information Systems (AIS).
- Institute for Operations Research and the Management Sciences (INFORMS).

Teaching Experience

Georgia State University

Atlanta, GA

Instructor of Record, Programming for Business

Spring 2026

- Taught online and in-person sections using Python for business data processing and analysis.

Georgia State University

Atlanta, GA

Teaching Assistant

2023–2025

- IFI 8410, *Programming for Business* — Fall 2025; instructor, Dr. Saeid Motevali.
- BA 9360, *Managing AI in Business and Society* — Spring 2025; instructor, Dr. Arun Rai.
- *Introduction to Python* — Fall 2023; instructor, Charlotte Alexander; Delta Analytics Academy (Delta Air Lines employees).
- *EMBA Analytics Certificate Program* — Supported students during project sessions.

Graduate Research Assistant Experience

Georgia State University; supervisor: Dr. Yusen Xia.

The Wall Street Journal & New York Times News Analytics Project

Spring 2022

Built newspaper datasets, including WSJ URLs from 2012–2021; coordinated acquisition and quality assurance, and supported sentiment analysis.

Text Analytics Research Project (Factiva)

Fall 2021

Coordinated approximately 77 GRAs and student volunteers across two sessions; managed Factiva article collection and dataset construction for faculty text analytics research.

Industry Project Experience

Georgia State University; projects with Dr. Yusen Xia and industry partners.

Truist Blockchain Exploration Project

Spring 2022

Researched financial-services applications of blockchain, including privacy, security, storage, and smart contracts; contributed technical recommendations and presentations with Truist professionals.

Carpuppy Sprint Project

Fall 2021

Investigated maintenance costs, VIN-linked vehicle attributes, and automotive datasets; contributed to sprint reviews and final presentations for Carputty.

Awards & Honors

Outstanding Reviewer

2024

Americas Conference on Information Systems (AMCIS)

Professional Service

Reviewing Experience

- **Journal Reviewer:** *Journal of Business Research*; *Electronic Commerce Research*.
- **Conference Reviewer:** International Conference on Information Systems (ICIS); Pacific Asia Conference on Information Systems (PACIS); Americas Conference on Information Systems (AMCIS).

Conference Service

- **Conference on Information Systems and Technology (CIST):** Volunteer, 2025.
- **Robinson Impact Summit (RIS), Georgia State University:** Planning Committee Member, 2025.

Leadership & Community Service

- **North American Chinese Bilingual (NACB) Toastmasters Club:** President, 2025–2026; Secretary, 2024–2025.

Research Methods & Technical Skills

Empirical Methods: Experimental design, econometric analysis, causal inference, survey design, and multivariate analysis.

Computational Methods: Computational experiments, machine learning, text analytics, and large-scale data collection.

Analytical Methods: Mathematical modeling, optimization, dynamic programming, and algorithm design.

Design Science Methods: Framework development and artifact evaluation.

Programming & Software: Python, R, SQL, Stata, MATLAB, SPSS, Tableau; Git for version control.
